

'TheTester' Applet Demo Page

The following tests are administered by 'TheTester', an applet written in the Java programming language. Copies are free and available in a start-up kit that contains several items.

To download a copy you can visit Mr. Ralph Sutter's On-Line Classroom site,
Or you can download it from here.

See the test-making instructions for the multiple-choice tests, for the fill-in-the-blank tests, and instructions for using the applet-tag. The best strategy to get started is to use the example pages as a template. If you have any questions, email (dbolton@IdeaPlace.org) and I'll offer technical support.

NOTE: A user will need a JAVA-ENABLED browser to access and run these tests: Netscape 2.0 or better and Internet Explorer 3.0 or better for the PC, and Netscape 3.0 or better for the Mac.

Examples

Scientists' Ball (5 multiple-choice questions)

Scientists' Ball (5 fill-in-the-blank questions)

A Halloween Ghoulish Glossary (13 lucky multiple-choice questions)

Scientists' Bio Facts I bet you didn't know (4 multiple-choice questions)
